

# GCA and SUN: A Winning Combination in Identity Management

## Purchase the Sun Identity Management Suite from GCA:

Reduce costs, maximize IT efficiency, strengthen security, and ensure regulatory compliance with the Sun Java System Identity Management (IdM) Suite. This industry-leading product platform can provide your organization with a comprehensive Identity Management solution designed for performance, scalability, extensibility, and integration with your existing enterprise middleware products. Key components of the Sun IdM Suite include:

- **Identity Manager:** Provisioning; Password Management; Policy Management
- **Access Manager:** Authentication; Authorization; Single Sign-On
- **Directory Server:** Directory, Password Synchronization, and Proxy Services
- **Identity Auditor:** Automated Risk Assessment; Detection, and Notification of Audit Policy Violations

These products are available in any combination, to fit your business needs, and may be purchased directly from your local GCA representative.

## Then Maximize Your IdM Investment with GCA Service Offerings:

GCA employs some of the most sought-after experts in this subject area. Our consultants have developed the latest Sun training materials and have educated Sun partners in IdM throughout the United States and the Far East. Let us put this knowledge to work for you, and maximize your investment in the Sun Java System Identity Management Suite. GCA's Professional Services in Identity Management include:

- **Consulting Services:** Through our consulting practice, GCA experts will help you plan and implement an IdM solution that addresses your business needs.
- **IT Talent Management / Training:** GCA's IT Talent Management services are designed to assess IT staff knowledge, create learning paths to optimize skills, and offer training to close knowledge gaps.
- **Support Services:** GCA Software Support Services for Sun Identity Management products are available at two levels: standard and premium. GCA support, offered through Sun, gives you the choice of on-line self-service, live telephone, and on-site, in-person assistance, depending on your needs.
- **IdM Audit and Directory Consolidation Service:** Using this service, we will assist you in discovering your informational assets and streamlining workflows and resources for your IdM implementation.

Professional services are available as a part of any Sun Identity Management solution delivered through GCA, and can be utilized flexibly to best fit the needs of your organization.
